

Online Learning Information for Parents and Students while self-isolating

Due to the diminishing number of COVID cases and Household contacts we will no longer be offering hybrid teaching (both face to face and online learning at the same time), as the majority of our students will be at school learning.

If your son is in the **Junior School** he can still access previous learning activities set in each Google Classroom if he is well enough to do so. However, in general, with the shortened isolation period we would expect that he will catch up with his learning once he returns to school.

In the **Senior School**, if your son is well, he can continue with his classroom learning and assessment activities. Where needed, he can make contact with his teacher/s by email.

Classroom teachers are advised when students have tested positive for COVID. We understand that for some students they are unwell and unable to complete their classroom learning for several days and in some cases for longer than this. We also understand, that where this is possible, assessment extensions will be required.
