BYOD Recommended Specs

Students need their devices to be quick, powerful, and practical to work effectively in the classroom using modern educational applications today. To keep up with computing demands regarding performance, compatibility, and usability we recommend your machine has **at least** the following specs:

	General Purpose	Digital Media Content Creation
	For subjects mainly requiring word processing, internet research, and basic media development. <i>e.g English, Math, Accounting.</i>	For subjects requiring heavy digital content manipulation. Illustration, animation, video, 3D rendering, and programming. <i>e.g Digital Technology, Design Technology, Art Design.</i>
MINIMUM SPECIFICATIONS		
Processor	Intel Core i5 or AMD Ryzen 5	Intel Core i7 or AMD Ryzen 7
RAM	8GB RAM	16GB RAM
Disk Space	256GB SSD	256GB SSD
Operating System	Windows 10 Pro	Windows 10 Pro
Input	Keyboard with Mousepad	Keyboard with Mousepad, External Mouse
Screen	At least 13"	At least 14"
USB	2+ USB ports	2+ USB ports
Graphics	Onboard	Dedicated

OPTIONAL SPECIFICATIONS	
Tablet mode with Stylus Pen	Write directly on the screen to mark-up documents, draw diagrams, take notes, and sketch etc.
Dedicated graphics card	Get even more power for running media development applications (video composition, 3D rendering, CAD, animation)
SD Card Reader	Easily plug in your SD card to download media from cameras, phones, etc

NOW ADD SOME FLAVOUR... After securing these specs, it's what feels right to you that should decide all the rest. Things like colour, brand, slimness, weight, etc. On the next page, we've made a few suggestions which you may want to look at.

$7 = 2x + 1$
 $6 = 2x$
 $3 = x$

It's what's on the ~~inside~~ that counts.

outside

It is very important your computer has the good stuff inside, however, a careful decision regarding the build could boost your student-abilities ten-fold. With the right machine you could use a stylus pen and draw directly onto the screen.

Like this! A feature that would be very handy when drawing diagrams, sketching, etc!

The following computers have ample power, however, have fundamental differences in their construction. These differences will dictate the way you interact with the computer in the classroom environment. Take the time to learn these different form factors and give them a try in your local computer stores.

Type	2-in1 Laptop	Laptop Convertible	Tablet	Standard Laptop
				
The Gist	A touch laptop which has a screen which can be "undocked" to become a tablet to write on with a stylus pen.	A touch laptop which you can use in tent, stand, tablet, and of course laptop mode.	Primarily a tablet with stylus pen, which has the ability to dock a magnetic keyboard.	The standard laptop which has served us well for years.
Model	e.g. Microsoft Surface Book 2	e.g. Acer Aspire Spin 5	e.g. Surface Pro X	e.g. HP Elitebook
